Application: Foliar Spray and Soil Application

NanoPhite™ is a unique phosphorous formulation that targets whole plant health. Aqua-Yield's Enhanced NanoShield Delivery™ provides phosphite to any crop to improve natural defenses against environmental stress, pest and disease. NanoPhite has superior foliar activity for boosting plant vigor in-season.

Why Use NanoPhite?

- Unique formulation affects whole plant health
- Absorbed foliarly for fast results
- Improved crop quality and yield
- Increases uptake of other nutrients
- Can be applied in-season with herbicides and pesticides

Application Rates:

Apply NanoPhite 4 fluid ounces (118.2 ml) to the acre. Use 1 - 4 times a month in addition to current fertility programs.

General Use Directions: Use sufficient water to ensure thorough plant coverage. Spray volume solutions should not exceed 1%. Application can be made via aerial, ground, or conventional sprayers at 10 to 500 gals. water per acre. Use 4 oz per acre up to 100 gals. water per acre.

Storage and Handling: To protect from frost, do not store at temperatures below 32°F. Store product tightly sealed in a cool, dry storage area and keep out of reach of children and animals. Never add water to the container contents.

Disposal: Triple rinse empty containers with a detergent solution or puncture and discard empty containers in a landfill in accordance with current local, state and federal regulations. Be careful to avoid contamination of water sources when cleaning equipment or disposing of waste.

Precautions & Recommendations

- Blending this product with adjuvants or surfactants is not recommended.
- Do not mix with copper-based fungicides or fixed copper if the spray solution is below a pH of 6.
- Adhering to all precautions and incorporating sound cultural practices when using this highly concentrated product will prevent foliar injury, foliar burning, root injury, phytotoxicity, pH changes in your planting medium, or damage to application equipment.
- Compatibility should be tested before applying combinations of this product with any other product. For first time applications and new spray combinations, a phytotoxicity trial is recommended.
- Contact a local agricultural extension agent, a certified crop application advisor, or authorized Aqua-Yield representative for more information.

Add Fertilizer

Important: read before using

Read the entire directions and the warranty disclaimer and limitation of liability before using this product. If terms are not acceptable, return unopened product. By using this product, user/buyer accepts the following warranty disclaimer and limitation of liability. Warranty disclaimer and limitation of liability manufacturer and seller warrant that this product conforms to the chemical description on the label thereof and is reasonably fit for purposes stated on the label when used in strict accordance with the directions for use. Tests have not been conducted on all varieties of food crops and plants, possible use or application with other products, the manner of use or application, or under all conditions. Manufacturer and seller make no other express or implied warranty of merchantability or fitness for a particular purpose. Where permissible, it is manufacturer and seller's intent to limit any liability for special consequential or incidental economic damages to refund or purchase price or replacement of product, at manufacturer's or seller's choice. Manufacturer and seller disclaim any liability for compensatory or other damages arising out of any use contrary to label directions or shipping of product. Use contrary to label directions is not permitted. User assumes all responsibility for damages caused to crops when exceeding application rates.

Information regarding the contents and levels of metals in this product are available at <http://aapfco.org/metal.html>

Disclaimer

If applied with a fungicide or pesticide, it is the users responsibility to conduct a trial application on the crop(s) to be sprayed with this mix of chemicals to determine compatibility of products and compatibility with crop(s) sprayed. When mixing with other spray materials a jar compatibility test is recommended.

Conditions of Sale

Seller warrants that this product conforms to the chemical description on the label thereof and is reasonably fit for purposes stated on the label when used in accordance with directions under normal use conditions. Crop injury, product use ineffectiveness, or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of Seller. In no case shall Seller or it's distributor be liable for consequential, special or indirect damages resulting from the use, handling, or shipping of this product. All such risk shall be assumed by the buyer /end user. Seller makes no warranties of merchantability or fitness for a particular purpose nor any other express or implied warranty except as stated above.
