

Special K-Mag+

0-0-10 POTASSIUM & MAGNESIUM ACETATE FERTILIZER

GUARANTEED ANALYSIS

Soluble Potash (K ₂ O).....	10.0%
Magnesium (Mg)	4.0%
4.0% Water Soluble Magnesium (Mg)	

Derived from: Potassium and Magnesium Acetate.

GENERAL INFORMATION

Special K-Mag+ is a highly available liquid formulation of potassium and magnesium acetate utilizing patented *“Enhanced Nanoshield Delivery™ by Aqua-Yield®”* to maximize absorption. **Special K-Mag+** has a low salt index allowing for superior absorption quickly increasing nutrient levels with minimal burn potential, even at higher rates. The organic nature of **Special K-Mag+** provides exceptional absorption of potassium and magnesium over other commonly used sources as well as maintaining plant/application safety at higher rates. **Special K-Mag+** is especially effective during rapid growth periods, fruit development and sizing when potassium and magnesium utilization is greatest.** *Use caution when tank mix pH goes below a pH of 6. A jar test is recommended to test compatibility when new or unfamiliar tank mix combinations are used. When used as directed this product does not supply all the nutrients required by plants and is designed to supplement a soil fertility plan.***

GENERAL APPLICATIONS AND RECOMMENDATIONS

AERIAL APPLICATIONS: Use 1 to 4 quarts/acre in 3 to 10 gallons of water of spray solution.

SPRINKLER/DRIP IRRIGATION (under canopy) – tree: Use 1 to 10 quarts/acre per application beginning at full leaf and schedule as necessary every 10 to 14 days. **Vegetables, vines and row crops:** Use 1 to 10 quarts/acre per application; make sequential applications based on crop development every 10 to 14 days. *Higher rates are for Flood and Furrow Irrigation.*

PIVOT/OVERHEAD IRRIGATION – Vegetable and row crops: Apply 1 to 10 Quarts/acre per application as needed every 10 to 14 days. **Trees:** Apply 1 to 10 quarts/acre. After injection, allow irrigation to run long enough to wash residual fertilizer from foliage.
