

TriYield[™] Special-K

5-0-20

POTASSIUM ACETATE AND SLOW RELEASE NITROGEN

GUARANTEED ANALYSIS

Total Nitrogen (N).....5.0%

2.0% Urea Nitrogen

3.0% Other Soluble Nitrogen*

Soluble Potash (K₂O)..... 20.0%

**Contains 3.0% slowly available nitrogen from Urea-Triazone*

Derived from: Urea-Triazone and potassium acetate.

GENERAL INFORMATION

SPECIAL-K 5-0-20 is a liquid formulation of 3% SRN (Slow Release Nitrogen) urea-triazone with potassium acetate. **SPECIAL-K 5-0-20'S** low salt index and superior foliar absorption quickly increases potassium and nitrogen levels in plants with minimal potential for burn, even at higher rates. **SPECIAL-K 5-0-20'S** triazone nitrogen and acetate potassium sources provide greater absorption than other commonly used potassium sources such as potassium nitrate as well as having increased plant safety even at higher rates. **SPECIAL-K 5-0-20** is especially effective during rapid growth periods, fruit development and sizing when potassium utilization is greatest.

**** Use caution when tank mix pH goes below a pH of 6. A jar test is recommended to test compatibility when new or unfamiliar tank mix combinations are used. When used as directed this product does not supply all the nutrients required by plants and is designed to supplement a soil fertility plan.****

Net Weight: 26.25 lbs. (10. 5 lbs. / gallon)

Net Contents: 2.5 Gallons
